

## Project Demo Checklist

1. A demo sign up sheet will be available at the end of April.
2. Every member has to be present in the demo session.
3. Every member has to bring the peer evaluation.
4. Every member has to bring own laptop with the source codes submitted on the due date December 6.
5. Come to my office 10 minutes before the scheduled time and have your laptop and IDE ready before the demo starts. (No time to boot up the laptop or load IDE during the demo time.)
6. The team representative shows me the last modification date of the program. The last modification date is expected to be before May 9 11:59pm.
7. The team representative will do the demo by executing the program. I will have a list of rubrics to assess the functionality of the program.
8. After demo is done, every member opens the IDE on his/her laptop at the same time. Questions will be asked and you will given by 1 minute to answer each question. You will answer the question by pointing out the corresponding source code of your program.
9. You are supposed to know the entire implementation no matter which part of the program you wrote.
